In addition to Azure, we have also successfully passed the C5 adequacy test for Type 1 for the Avvia AWS sub-area. This certificate will be valid from June 30, 2024.

At your request, we hereby publish this win for the company, it was a reason to celebrate.

CENTRAL FUNCTIONS

C5 stands for the acronym: Cloud C computing C compliance C criteria C catalog and is a certificate of the Federal Ministry for Information Security (BSI).

The C5 certification for certificate type 1 for **Avvia Azure** and **AWS** (VPC still pending) has already been successfully completed for Arvato Systems.

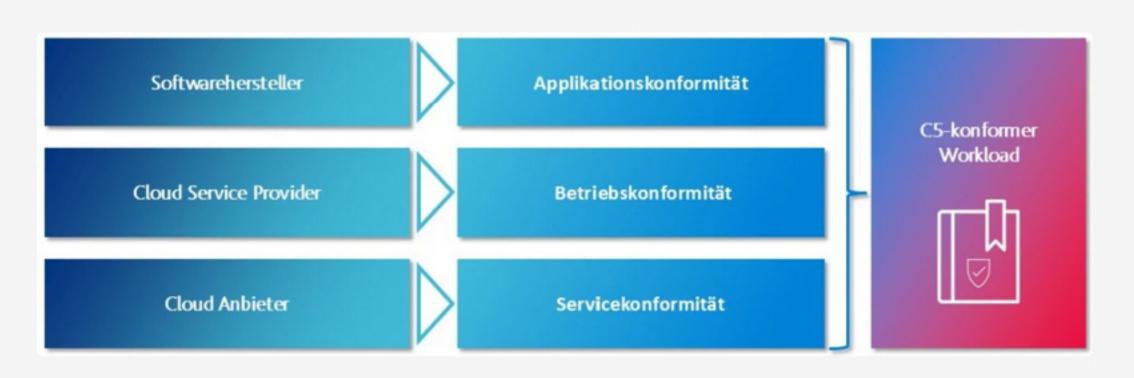

- 1. Type 1 = Adequacy test (legally required from 01. July 2024)
 - b. Audit <u>at</u> a specific time<u>point</u> (time of audit performed)
 - c. Reference to a policy (in the company); Implementation & Establishment of controls

From 01. July 2025 the Type 2 is required by law. Type 2 certification goes beyond the adequacy test. An effectiveness test is then required here.

- 1. Type 2 = Effectiveness test
 - b. Test <u>over</u> a certain time<u>period</u> (e.g. the past year). e.g. the past year)
 - Proof of ongoing effectiveness during the audit period
 - c. Proof that the directive has been implemented.
 This attestation is then the actual one of client interest.

What does C5 Type 2 mean for Arvato Systems?

In the Avvia environment, we work with the relevant native hyperscalers and can use the hyperscalers' C5 attestations to build on them. In parallel, we are creating the (almost) complete re-testing of our **Virtual Private Cloud** (VPC) with up to 80 hyperscaler-specific controls.

Our benefits from the C5 certification

- 1. Great time and cost savings due to the elimination of repeated audits, e.g. in the HR area.
- Control descriptions and external representations from Arvato Systems are available and already coordinated - a great added value for our clients from the healthcare sector.

Thank you

We would like to thank all supporting persons and teams very much for the C5 certificate, which brings us a lot further in the cloud area and also company-wide and enables our clients in the healthcare sector to process data in compliance with the law.

At the moment we only have the German certificate from AWS and Azure. If you need an English C5 certificate, a new one will be necessary!

We will of course keep you up to date on further upcoming extensions to the certificate!

The Avvia Team

We Empower Digital Leaders
